Housing Instability: What the Data Show

June 29, 2021

Mary Cunningham, Vice President, Metropolitan Housing and Communities Policy Center
A look at housing insecurity before COVID-19
The Rental Market Pre-Covid

- 11 million renters (almost 25%) pay more than half their incomes on rent
- 20 percent of renters don’t have $400 in liquid savings
- Rental housing supply shortage of 7 million homes for extremely low-income renters
- Only 1 in 5 renters who qualified for federal housing assistance received it
Share of Renters with Cost Burdens by Race & Ethnicity

Source: Harvard Joint Center for Housing Studies, State of the Nation’s Housing 2020
Eviction before the pandemic

- Almost **900,000 renters** were evicted each year
- **People of color**, especially women of color, and single-parent headed households were at the **highest risk for eviction**
- **Less than 10 percent** of tenants have legal representation in eviction proceedings across housing courts nationwide
People of color—especially Black, Indigenous, and Latinx people—are overrepresented among people experiencing homelessness.

How has the pandemic affected and perpetuated housing insecurity and racial disparities among renters?
Low Income Renters Were More Likely to Work in Industries Vulnerable to COVID-19

Source: Urban Institute calculations from the 2018 American Community Survey.
Note: We grouped household income relative to the area median income and looked at all individuals within those households. For non-metropolitan statistical areas (MSAs), median household income is calculated by using the population within the state who are not living in MSAs.
Historic High Rates of Unemployment in 2020, still high for some in 2021

Note: For civilian Americans, seasonally adjusted. White, Black, and Asian categories are not exclusive of Hispanic ethnicity.

2019–20

Estimates of back rent owed

- As of early 2021, estimates ranged from $11 billion to $53 billion
  - There is no one data source tracking rental payments and economists rely on a range of assumptions to create estimates
- Stimulus payments helped but did not cover all rent owed
- Rental debt remains substantial despite gains in the labor market
- Households of color and female-headed households have greater rental debt (Philadelphia Federal Reserve, March 2021)
Emergency Rental Assistance

- Many state and local emergency rental assistance programs started using CARES Act funding in 2020
- In December 2020 and March 2021, Congress appropriated almost $47 billion in emergency rental assistance funds
- Funds are administered by state and local housing and community development agencies, with agency type varying by place
- 10% of program funds may be used for housing stability services, such as housing and counseling and legal support services
- Prohibits the eviction of renters for nonpayment in months for which they receive emergency rental assistance; many programs cover a longer period (30-90 days)
What is the situation for renters now?
Over 7 million renters behind on rent in March and June of 2021 (17 and 14 percent, respectively, of adults in renter households)

Renters in the United States, 2021

No 17% 14%

Payment status

Source: Authors’ calculations using U.S. Census Bureau Household Pulse Survey
Data collected between March 3 to March 15 and May 26 to June 7.

Note: Results include estimates for renters who responded to the survey and
answered specific questions about their ability to pay rent. The Pulse Survey
provides estimates for all adults in households; therefore, percentages should be
interpreted as the share of adults in households who pay rent.
Black, Latinx, and Asian renters are more likely than white renters to be behind on rent

**Source:** Avail May 2021 Tenant Survey
Some eligible landlords chose not to apply for ERA due to issues related to communication with tenants, complicated eligibility criteria, and other factors.

**Survey Question:** If eligible but have not applied for ERA, what factors most influenced your decision? (Those who are eligible but have not applied)

- 30.4% Communicating with tenants
- 30.4% Complicated eligibility criteria
- 21.7% Having to waive evictions during the period of assistance
- 21.7% Uncertainty about receiving the rental assistance payment
- 21.7% Preparing and filing documents
- 17.4% Had knowledge of programs, but difficulty finding rental assistance
- 8.7% Having to forgive back rent to receive rental assistance (if applicable)
- 43.5% Other

*Source: Avail 2021 May Landlord Survey*
Clock is ticking on getting rental assistance to renters who need it the most.
